- Manage the design teams priorities, tasks and inform the design schedule.
- Support in the recruitment for design roles in unison with studio budgets and objectives.
- Develop and maintain design pipelines, tools, workflows and their related documentation.
- Work closely with game team to prototype game elements.
- Provide coaching for designers in the various tools and processes.
- Facilitate communication between design, art , code and engine teams.

### Qualifications

- Excellent at generating ideas for gameplay and structure around a core theme.
- Able to communicate ideas and champion the experimentation of it.
- Confident to test and throw away ideas that do not work.
- Superb organisation of ideas into design specification; maps, charts and tables for game structure.
- Understands player difficulty and can provide solutions in catering for this.
- Can evangelise a games design, objectives and purpose.
- Strong technical understanding of gameplay development.

### Personal Attributes

- A love for video games and the craft of game development.
- Ability to critique and provide constructive feedback.
- Able to work with a team across engineering, animation and art departments.
- Excellent oral and written communications.
- Understands other departments needs and requirements.
