Programmer

Description

We are looking for a programmer to join our development team supporting a range work on New IP for console and other platforms as required. You will have coding and engineering experience in a recent posting that could be games or another industry. We work in UE4 and/or Unity so experience working in these engines would be a benefit although not a pre-requisite.

Responsibilities

Reporting to the Lead Programmer and coordinating with other team members on code objectives.
Design & Create efficient C++ and "Blue Prints" for for the game(s)
Help to develop solutions for game play or prototypes
Work closely with game team(s) to develop game features.

Qualifications

Able to code in C++ to a confident standard.
Experienced working with a project codebase.
Experienced using source control.
A strong problem solving ability.
BSc in Computer Science or similar work experience.

Job Benefits

- We operate a 1 hour Flexible Working Time
- Nest Pension Scheme
- Private Health scheme
- Free Parking
- Breakfast, fresh fruit, hot drinks, snacks provided
- Walking distance to brand new retail park with restaurant and sports facilities
